Welcome Home

Are you or someone in your family feeling the impact of pre- or post- deployment?

Dealing with injuries, physical symptoms, or stress associated with combat?

Facing problems with finances, work, housing, or childcare?

Having trouble re-connecting with family and friends?

Having difficulty finding and obtaining needed services?

Unsure of your next step?

Care Managers can help

Care Managers help you and your family members deal with the needs and challenges associated with deployment. Our goal is to help you reconnect and reintegrate into the non-combat environment. Care Managers focus on behavioral and social issues and provide a variety of other services you may need to help you during this transition.

All Fort Hood Care Managers are Licensed Clinical Social Workers.
